Features

Exceptional 1,100Nm Tightening Torque

It boasts an exceptional tightening torque, providing maximum power for fastening tasks, while its fast nut loosening speed ensures efficient and swift removal.

4-Step tightening mode selector

The WR36DA offers versatile tightening mode settings to accommodate different applications and loads. The 4 available modes are Low1, Low2, Medium, and High, each indicated by a corresponding indicator lamp.

IP56 Dust and water-resistant

This rugged construction ensures the tool can withstand harsh working environments, providing durability and reliability in challenging conditions.

Ease of use

It features a user-friendly mechanism that makes it easy to attach and remove the socket, saving time and effort when changing between different sizes or types of fasteners.

Applications

Tightening and loosening of all types of bolts and nuts, used for securing structural items
